What is Law, in Althusser

By Roberto Unger

I. Law is a matrix

What Poulantzas call the representation, regime, phase and structure of government with a side given to capitalism and a side given to the people, and one given to government and planning, which then is also about the represented leader who in fact is a praxis person which has to make a legal argument all the time because it creates the correct following of the law.

II. In Althusser in fact (A Surprise, that he is having a health problem in 1988, when in fact he lives in a mansion according to the law)

In his problematic for a leader or a philosopher Althusser argues 'the process of economics, philosophy an in fact aesthetics with creative cinema on the topic all the time is the way to lead'

III. Recent Arguments by Sirohi

Believe in Althusser – just create a formalistic separation of

A) Department of Production
B) Department of Distribution
C) Department of Consumption

This System which then has

A. Department of History, Universities and even Housing (Sirohi)

Now just articulate the three points –

I) Poulantzas
II) Althusser artisticially
III) Historical Materialism with Economic Comments all the time. (Sirohi)

Always remember – the New Left wins because they make legal arguments – PCF and Althusser make Marx-Hegel comments.

We need creative forms more in fact, the economy his Majesty demands, and then comes in Sirohi at the weakest link.
